Hiring Team

DataQueue

Dear Hiring Team,

I'm excited to apply for the Train-to-Hire Full Stack Developer role at DataQueue. As a passionate junior developer currently enrolled in a full-time Full Stack Web Development Bootcamp at AXSOS Academy, I've gained strong hands-on experience in both frontend and backend technologies including HTML, CSS, JavaScript, React, Node.js, Python, and Django.

In addition to my training, I hold a Bachelor's in Computer Information Systems and a Diploma in Programming and Databases. I've developed several real-world projects, including a personal portfolio and multiple WordPress websites, and I'm confident in my ability to learn quickly and contribute effectively to your fast-paced team.

I'm particularly drawn to DataQueue's focus on voice AI and modern technologies like NestJS and Next.js. I'm eager to grow in this field and be part of a team that values clean code, innovation, and real-world impact.

Thank you for considering my application. I would love the opportunity to further discuss how my background aligns with your goals.

Sincerely,

Omyma AlKurd
